Please find below and/or attached an Office communication concerning this application or proceeding.

AK

Office Action Summary	Application No. 10/743,221	Applicant(s) WESTWICK ET AL.	
	Examiner Steven J. Mottola	Art Unit 2817	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☐ Responsive to communication(s) filed on ____.
- 2a) ☐ This action is FINAL. 2b) ☒ This action is non-final.
- 3) ☐ Since this application is in condition for allowance except for formal matters, prosecution as to the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

Disposition of Claims

- 4) ☒ Claim(s) 1-24 is/are pending in the application.
- 4a) Of the above claim(s) ____ is/are withdrawn from consideration.
- 5) ☐ Claim(s) ____ is/are allowed.
- 6) ☒ Claim(s) 1-24 is/are rejected.
- 7) ☐ Claim(s) ____ is/are objected to.
- 8) ☐ Claim(s) ____ are subject to restriction and/or election requirement.

Application Papers

- 9) ☐ The specification is objected to by the Examiner.
- 10) ☐ The drawing(s) filed on ____ is/are: a) ☐ accepted or b) ☐ objected to by the Examiner.
Applicant may not request that any objection to the drawing(s) be held in abeyance. See 37 CFR 1.85(a).
Replacement drawing sheet(s) including the correction is required if the drawing(s) is objected to. See 37 CFR 1.121(d).
- 11) ☐ The oath or declaration is objected to by the Examiner. Note the attached Office Action or form PTO-152.

Priority under 35 U.S.C. § 119

- 12) ☐ Acknowledgment is made of a claim for foreign priority under 35 U.S.C. § 119(a)-(d) or (f).
a) ☐ All b) ☐ Some * c) ☐ None of:
1. ☐ Certified copies of the priority documents have been received.
 2. ☐ Certified copies of the priority documents have been received in Application No. ____.
 3. ☐ Copies of the certified copies of the priority documents have been received in this National Stage application from the International Bureau (PCT Rule 17.2(a)).
- * See the attached detailed Office action for a list of the certified copies not received.

Art Unit: 2817

Claims 19-25 have been renumbered as claims 18-24 since no claim 18 has been presented. 37 CFR 1.126. The new numbering will be used in the action to follow.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-24 are rejected under 35 U.S.C. 102(e) as being anticipated by Jin et al.

Treating independent claims 1, 10 and 18 first, Jin et al. disclose in fig. 3 an amplifier stage 331 that may be read as the first stage claimed; a feedback is developed by comparing the input V_{ref} to the noninverting input of amp 331 with the output of amp 331. The comparison is performed by comparator 353 including amp 353a which may be read as the amplifier (line 4) of claim 18. Amp 311 receives the feedback and serves as a preamp for amp 331; thus amp 311 may be read as the second amplifier stage of the claims. The limitation "RF power amplifier" is regarded as specifying an intended use of the invention. The feedback action will cause a predetermined relationship to exist between the DC levels at the input and output of amp 331, meeting claims 2, 11 and 19, and the feedback is generated based on the DC levels at the input and output of the amp 331 since V_{ref} is compared with the output of low pass filter 352, thus meeting claims 4, 5, 13, 21 and 22. Regarding claims 3, 12 and 20, the since variations of

Art Unit: 2817

the output DC level from V_{ref} (approximately due to the presence of resistor R5) will cause a corrective feedback signal the DC level at the output should be approximately equal to the input. Amp 311 receives the feedback at its input and serves as a preamp for amp 331. Thus amp 311 may be read as the second amplifier stage of the claims. Regarding claims 7 and 15, the amplifier will inherently be nonlinear to some extent. Regarding claims 8 and 16, as noted above amp 311 will serve as a preamplifier for amp 331. Regarding claims 9,17 and 24, amp 311 receives an input signal; the term RF specifies only a broad frequency range indicative of an intended use of the invention. Regarding claims 6,14 and 23 Jin et al. give an example of a 2.5 volt DC level (fig. 4) at the amp output for an input varying about 2.5 volts. This would be half of the typical 5volt supply for op amps as employed by Jin et al.

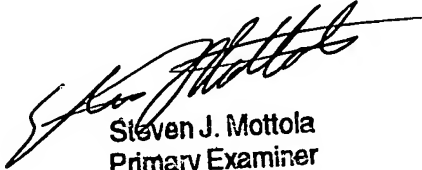

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Steven J. Mottola whose telephone number is 571-272-1766. The examiner can normally be reached on M-Th from 7:30 to 5. The examiner can also be reached on alternate Fridays from 7:30 to 4.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Robert J. Pascal, can be reached on 571-272-1769. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.

Art Unit: 2817

For more information about the PAIR system, see <http://pair-direct.uspto.gov>. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free).
